

UNLEASH GLOBAL POTENTIAL

TAILORED IMPORT TOLERANCE SERVICES

Seamless global tolerances for your agricultural products

More countries than ever are regulating and testing for pesticide residues on imported foods. Growers prefer plant protection products with a broad set of approved Maximum Residue Limits (MRLs) and import tolerances. Optimise your global MRL strategy with our tailored import tolerance services.

We help you navigate the complex world of international pesticide regulations, staying up-to-date with shifting requirements and helping you ensure regulatory compliance every step of the way. Your submissions are supported by our local in-country experts, who communicate directly with the local authorities.

Benefit from our services

- ▶ Conducting comprehensive strategy assessments and data gap analyses
- ▶ Planning and monitoring residue trials
- ▶ Writing, auditing, and summarising residue reports
- ▶ Preparing import tolerance petitions and conducting MRL assessments
- ▶ Compiling and submitting dossiers to the respective authorities
- ▶ Monitoring submission status and answering authority requests

Submissions can take years to be approved. Let's get started creating your petition to a regulatory authority in Europe, Asia or the Americas so you can receive your import MRL in time to compete in the market.
