

MEDICAL DEVICES

**BIOLOGICAL
EVALUATION
WITH CHEMICAL &
TOXICOLOGICAL
CHARACTERISATION**

Strategies for assessing biological safety of your medical devices

The product range of medical devices is very broad. From wound dressings, via dental materials, respiratory devices to long term implants – whatever device you have, we will support you to get it safely on the market.

Take advantage of our range of services

- Compilation of a biological evaluation **plan**
Material characterisation, data gap analysis, strategy development, testing recommendations
- Study concept **management** and study **monitoring**
Testing for extractable/leachable substances, biological testing
- Compilation of a biological evaluation **report**
Toxicological risk assessment of extractable/leachable substances, conclusion on the biological safety
- Zoonosis risk **assessment** for materials of animal origin
Manufacturing process investigation, literature search for relevant pathogens, conclusion on zoonosis risk
